

MAINTENANCE AND TURNAROUND

We have extensive experience in the execution of major turnaround events, single unit shutdowns and routine daily maintenance services.

We provide a range of services including:

- Planning preparation of work packs
- Procurement - materials and subcontract services
- Sub-contract management
- Provision of highly skilled engineering technicians (all disciplines)
- Replacement and refurbishment of plant assets
- Installation of equipment, pipework and structural steelwork
- Plant tie-ins, re-rates and testing
- Provision of commissioning support

Our client base demands and expects the highest level of rapid service carried out to stringent requirements of the Health and Safety Regulations, to ensure down time is minimised and when required we at FJN have a proven track record in the industry, working 24/7, both in our specialised fully equipped workshop and onsite.
