

# CONSTRUCTION & INSTALLATION SITE SERVICES

We have the resources and experience to offer a full mechanical and installation service. With the support of our regional operational businesses we can provide the competent resources needed to undertake medium to very large projects, thus enabling us to provide long term, high value services.

Construction and installation services include:

- Installation of plant, equipment, pressure vessels and balance of plant packages
- Installation of pipework systems in compliance with PED and most internationally recognised standards
- Installation of structural steelwork and pipe support systems
- Final testing and commissioning

Sub-contract management:

- Surface coatings, including paint systems, hot dip galvanising and pipe wrapping
- NDT services including radiography, MPI, DPI, UT, phased array etc.
- Pre-heat and post-weld heat treatment
- Insulation and fire proofing
- Scaffolding
- Cranes and heavy lift operations
